Hologram

1. Print the template on A4 paper
2. Cut along the template's outer straight lines and secure the template beneath the transparent plastic sheet with adhesive tape
3. Cut the plastic along the template's outer edges.
4. Carefully score the inner fold lines without cutting all the way through the plastic
5. Fold the plastic along the marked lines and join the two ends with adhesive tape to form a pyramid-like structure
6. Open a suitable hologram video on the phone and place the plastic structure in the center of the screen, aligning it with the marked position or the white X in the video.
